EDUCATION

BSc. Computer Science & Psychology

University of Victoria · Victoria, BC

May 2018 – Jan. 2022

TECHNICAL SKILLS

Languages	Java · JavaScript · TypeScript · SQL · Python · Bash · HTML/CSS · PowerShell
Frameworks	Spring Boot · Angular · Ionic · Node.js · D3.js
DevOps	CI/CD pipelines · Datadog · Git · Android Studio · Jenkins
IT Systems	Active Directory · SCCM · Intune · Jamf · ServiceNow · Jira · Visio
Platforms	Shopify (Liquid) · Google Ads · Figma · Observable

EXPERIENCE

IT Service Specialist | Aritzia

Nov 2025 – Present · Vancouver, BC

- Administer enterprise systems including Active Directory, SCCM, Intune, and Jamf across corporate and retail environments, maintaining endpoint health and compliance.
- Manage IT service requests end-to-end via ServiceNow, triaging and resolving Level 1 issues across hardware, software, and access management.
- Troubleshoot and resolve hardware, software, network, and POS (X-Store) issues across endpoints and internal systems to minimize operational downtime.

eCommerce & Digital Operations | Adore Vintage Tokyo Ltd.

Aug 2024 – Jun 2025 · Vancouver, BC

- Developed and iterated on Shopify storefront using Liquid, HTML, and CSS — redesigned product pages and improved interaction flows, driving measurable engagement improvements.
- Managed Google Ads campaigns and social media content strategy; applied analytics to iterate on creative and targeting.
- Handled end-to-end eCommerce operations: inventory management, customer service, fulfillment coordination.

Associate Software Developer | Infosys Canada

Feb 2022 – Oct 2023 · Remote

- Built and maintained full-stack features across enterprise web and mobile apps using Java/Spring Boot (REST APIs, service layer) and Angular/Ionic (responsive UI components, mobile views).
- Integrated Datadog into an Ionic mobile application with authentication, enabling real-time performance monitoring, error tracking, and observability for both web and mobile surfaces
- Worked within Agile/CI-CD pipelines using Git, Jenkins, and Jira; participated in code reviews, sprint planning, and program coordination.

PROJECT

LegoFlow Planner

- Built a Tetris-style task planner with HTML5, CSS 3D transforms, and line-clearing animations across dynamically stacked drag-and-drop components.
- Designed a multi-zone state model with reversible task transitions and real-time progress tracking across energy-based priority buckets.
- Wrote an automated subagent test protocol validating component nesting, drag event sequencing and animation timing.
